

## Part I(b), Infusion Cockapoo Registration Application Form

If Part I(a) of the Parent Breed Application has been approved, you will now need to submit Part I(b) of the Parent Breed Application. Part I(b) of the Parent Breed Application is solely based on acceptable health scores. The ALAA strongly recommends that breeders breed with the current breed average or better. The requirements are: (1) Hip scores (2) Elbow scores (3) OFA Patella certification (4) CERF exam (5) PRA-prcd testing or clear by parentage (6) vWB testing or clear by parentage (7) Thyroid results. **NOTE:** Any breeder who breeds a parent breed infusion without completing all parts of the Parent Breed Infusion Application will have the litter rejected for registration & inclusion in the Australian Labradoodle breed and will be subject to a \$400 fine and mandatory desexing of the entire litter.
